

DonJoy Back Brace II - TLSO

The DonJoy Back Brace II TLSO accommodates the appropriate motion restriction throughout the healing process. The lightweight design includes a patented Mechanical Advantage Pulley System, a quick-release shoulder strap buckle, and an easy to use thoracic adjustment. All these features allow for the patient to comfortably control and relieve acute pain often associated with anomalies of the spine such as osteoporosis, compression fractures, spinal stenosis, strain, and excessive kyphosis.

Indications

Intended for acute pain relief by thoracic postural extension alignment, compression fractures of the thoracic spine, arly onset through variable stages of osteoporosis, pre and post-surgical protocols, thoracic mechanical back pain and kyphosis.

PDAC APPROVED CODE: L0464
